

INTRODUCTION

The American Board of Urgent Care Medicine (ABUCM) serves as an independent certifying body for Urgent Care Medicine. The ABUCM was established in 1997 to certify properly qualified candidates in the specialty of Urgent Care Medicine.

The goals of the ABUCM are to establish high standards of clinical competence, improve the quality of patient care, and to promote continuing education that is required for professional excellence. The ABUCM serves two interrelated functions: to certify properly qualified candidates in the specialty of Urgent Care Medicine, and to ensure recognition of the resulting board certification.

The ABUCM is committed to the certification of qualified Urgent Care physicians. Certification by the ABUCM recognizes excellence in the discipline of Urgent Care Medicine. The purpose of certification in Urgent Care Medicine is to define the domain of knowledge and clinical skills expected of the Urgent Care physician, to provide a valid assessment of knowledge demonstrated by the Urgent Care physician, to encourage continued professional development in the field of Urgent Care Medicine, and to serve the public by encouraging quality patient care.

Board Certification is not a requirement to practice Urgent Care Medicine. The Board does not intend to interfere with or to restrict the professional activities of a licensed physician who is not Board Certified, nor to restrict the professional activities of a Certified Diplomate. The ABUCM does not discriminate on any basis, to include discrimination in regards to sex, color, creed, religion, disability, ethnic origin, sexual orientation, age, or any other reason unrelated to character or competency.

The American Board of Urgent Care Medicine is a private, non-profit corporation. The Board receives no public funds and has no licensing function. The Board is self-funded from the fees paid by candidates. Any income that exceeds expenses is invested in the continuing improvement of the certification and re-certification process.

THE BOARD CERTIFICATION EXAM

The foundation of the ABUCM examination is a practice analysis survey. The ABUCM reviewed the field of Urgent Care Medicine to define the role of the Urgent Care Medicine practitioner. Thousands of urgent care medicine physicians, representing all specialties of origin, were surveyed about their own practice, the types of patients they see and the type of procedures they provided. The examination was then designed to test the areas of knowledge determined to be essential for the current competent practice of Urgent Care Medicine across all clinical settings. The exam questions were developed by members of the Board and Diplomates of the American Board of Urgent Care Medicine under the direction of independent certification consultations and psychometrical evaluations which are intended to be medically and legally defensible.

The exam is an electronic exam comprised of 225 multiple-choice questions. It is broken down into seven general categories: General Medicine, Pediatrics, Surgery, Pharmacology, Public Health, Risk Management and Occupational Medicine.

These categories are further broken down into the more specific areas of abdominal and gastrointestinal disorders, cardiovascular disorders, thoracic and respiratory disorders, traumatic disorders, pediatric disorders, toxicology and clinical pharmacology, obstetrical and gynecological disorders, procedures and skills of Urgent Care Medicine, musculoskeletal disorders, cutaneous disorders, systemic and cutaneous infectious disorders, endocrine, metabolic and nutritious disorders, head and neck disorder, hematology and oncology disorders, nervous system disorders, psychological and behavioral disorders, urological and renal disorders, environmental disorders, immune system disorders, epidemiology, and public health disorders.

The content of the examination is divided into more than a dozen main knowledge areas including: anatomy/physiology, medicine, surgery, pediatrics, dermatology, infectious disease, pain medicine, radiology, orthopedics, pharmacology, psychiatry, sports medicine, occupational medicine, and compensation/disability/medical-legal issues. These areas are further divided into a matrix of sections. The information from the practice analysis survey is then used to determine the number of items to include under each of the knowledge areas.

APPLICATION

Physicians desiring to become board certified in Urgent Care Medicine must complete an application prior to examination. When submitting application materials, the \$975 examination fee must accompany the completed application.

To request an application, go to <http://abucm.org/exam-application.html>. Or, to receive an application by mail, please send a written request to the Board along with the \$100 application fee. Please send application requests and payments to:

American Board of Urgent Care Medicine
2813 S. Hiwassee Rd., Suite 206
Orlando, FL 32835-6690

PREPARING FOR THE EXAM

Physicians desiring to become board certified in Urgent Care Medicine must complete an application prior to examination. When submitting application materials, the \$975 examination fee must accompany the completed application.

To help you prepare for the Exam, the ABUCM has partnered with Exam Master® to develop a study and review program which is available through a custom online gateway. To get started on the Exam study course go to <http://abucm.org/exam-review.html>.

The following list of references may be helpful in reviewing for the exam. These publications are intended for use as study aids only. The American Board of Urgent Care Medicine does not intend to imply endorsement of any specific resources or texts, or any affiliation with publishers, authors or editors of said texts. The references listed may prove helpful in the review of the subject areas included on the exam.

TAKING THE EXAM

To sit for the exam, candidates submit an application for consideration and review by the Board. Once accepted as an exam candidate, the Certification Coordinator will work with the examinee to select a testing facility and schedule an appointment to take the exam. The exam is offered during four exam windows throughout the year: March, June, September and December. There are thousands of testing centers throughout the United States and abroad. Prior to the candidate's exam appointment, the examinee will receive a confirmation email containing all pertinent testing facility information and the Candidate Authorization Code.

EXAM SCORING AND REPORTING

The exam is designed as a minimum professional competency test and is not intended to distinguish scores achieved above a passing point. Therefore, no numeric scores will be reported to any candidate. Candidates who successfully pass the exam will receive a certificate and will be allowed to designate themselves as a Diplomate of the American Board of Urgent Care Medicine.

Failing candidates will receive a report showing subject area weakness(es) within 60 days of the exam date. Candidates are permitted to repeat the examination twice during the next two administrations of the exam. If a candidate does not succeed in passing the exam after two attempts, he/she will be required to show proof of cause or seminars, taken to remedy deficiencies. An administrative fee of \$150 must be submitted each time the examination is retaken.

APPEALS

Any failing candidate may appeal a decision of the American Board of Urgent Care Medicine by submitting a written notice of appeal to the Board within thirty (30) days from receiving a notice of his/her exam results. Appeals should be addressed to:

American Board of Urgent Care Medicine
2813 S. Hiwassee Rd., Suite 206
Orlando, FL 32835-6690

DEFERMENTS/RESCHEDULING

If a physician has been accepted as a candidate and has scheduled an exam appointment, but cannot take the examination, he/she may request a deferment to the next examination window without incurring a deferment penalty. The candidate must contact the ABUCM Certification Coordinator no less than 72 hours prior to their exam appointment, otherwise a \$150 last-minute rescheduling fee will be charged. One deferment is allowed, and the candidate must take the examination the next time it is offered. If the candidate has scheduled an appointment to take the exam, and the ABUCM Certification Department receives no notification of deferment, the candidate will be considered a "No Show" and there will be no refund of the exam fee. The candidate's application will become invalid and the candidate will be required to re-apply to be considered to take the examination. All application and exam fees are retained by the ABUCM.
